Please log my displeasure with the Department of Justice(DOJ) settlement with the Microsoft Corporation. This wasn't a settlement, it was a full surrender by the victor. I can not believe that the DOJ actually negotiated with this corporate thug. It should be apparent by now with this second major offense that Microsoft isn't interested in changing its ways. What is needed is a serious penalty that will actually harm the company. The original punishment as imposed by Judge Jackson did not go far enough. Given all of the companies that Microsoft has destroyed and all of the associated employees that lost their jobs, Microsoft as an entity should be dissolved, its corporate officers fined and put into jail.
